

Two-Digit Addition With Regrouping

Set out. Add the ones first. If there are ten or more ones, write the ones digit and carry one new ten.

SEE ONE

$$\begin{array}{r} + \quad 68 \\ 67 \\ \hline 135 \end{array}$$

Add the ones first. If there are ten or more ones, write the ones digit and carry one new ten.

$$68 + 67 = 135$$

TRY THE TRAIL

1

Line up place values.

2

Add from right to left.

3

Regroup when a column makes ten.

Notice this: The carried 1 is one ten, not one extra one.

CHECK YOUR TRAIL SENSE

Try this one without help.

$$\begin{array}{r} 64 \\ + 97 \\ \hline \end{array}$$

One careful line at a time. Accuracy comes before speed.

For the grown-up: How many ones stay? How many new tens move next door? Keep the answers on the separate key page.

Two-Digit Addition With Regrouping
