

Divide by 7, 8, 9, 11, and 12

Set out. Use a known multiplication fact or a nearby fact, then check by multiplying the quotient and divisor.

SEE ONE

$$72 \div 9 = 8$$

Use a known multiplication fact or a nearby fact, then check by multiplying the quotient and divisor.

$$72 \div 9 = 8$$

TRY THE TRAIL

1

Read the dividend and divisor.

2

Use the matching multiplication fact.

3

Multiply back to check.

Notice this: A correct quotient multiplied by the divisor returns the dividend.
