$$6 \div 3 = 2$$

Division can share one total into equal groups. Share one item to each group until every item has a place.

$$6 \div 3 = 2$$

TRY THE TRAIL

1

Count the total.

2

Share one item to each group.

3

Count how many finished in each group.

Notice this: Equal sharing means every group finishes with the same amount.

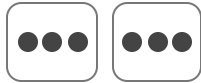

Ready? Flip the page and use the same move on each problem.
