

Multiply by 3, 4, and 6

Set out. Build harder facts from facts you know. Double a two fact to get a four fact, or combine a three fact with another three fact to get a six fact.

$$6 \times 9 = 54$$

Build harder facts from facts you know. Double a two fact to get a four fact, or combine a three fact with another three fact to get a six fact.

$$6 \times 9 = 54$$

TRY THE TRAIL

1

Read both factors.

2

Choose a fact strategy.

3

Multiply and check that the product is reasonable.

Notice this: A new fact can be split into two friendlier facts.
