

Missing-Number Subtraction Equations

Set out. Use the relationship between addition and subtraction to isolate the missing number, then substitute it back to check.

SEE ONE

$$93 - 8 = 85$$

Use the relationship between addition and subtraction to isolate the missing number, then substitute it back to check.

$$93 - 8 = 85$$

TRY THE TRAIL

1

Identify the missing number.

2

Use the inverse operation.

3

Substitute your answer to check.

Notice this: A missing starting number and a missing number taken away require different inverse moves.

Ready? Flip the page and use the same move on each problem.

Missing-Number Subtraction Equations

Do: Solve each problem. Use the picture or place-value setup when it is shown.

1

$$27 - \underline{\quad} = 25$$

2

$$\underline{\quad} - 82 = 133$$

3

$$191 - \underline{\quad} = 92$$

4

$$\underline{\quad} - 58 = 112$$

5

$$173 - \underline{\quad} = 90$$

6

$$\underline{\quad} - 73 = 95$$

CHECK YOUR TRAIL SENSE

Try this one without help.

$$\underline{\quad} - 51 = 55$$

One careful line at a time. Accuracy comes before speed.

For the grown-up: Is the blank the whole you started with, or the part taken away? Keep the answers on the separate key page.

Missing-Number Subtraction Equations

Keep going: Complete all 24. Work straight down each column.

1

$107 - \underline{\quad} = 61$

5

$87 - \underline{\quad} = 29$

9

$96 - \underline{\quad} = 6$

13

$45 - \underline{\quad} = 31$

17

$59 - \underline{\quad} = 42$

21

$58 - \underline{\quad} = 42$

2

$\underline{\quad} - 2 = 8$

6

$\underline{\quad} - 53 = 60$

10

$\underline{\quad} - 2 = 101$

14

$\underline{\quad} - 41 = 111$

18

$\underline{\quad} - 20 = 119$

22

$\underline{\quad} - 17 = 84$

3

$111 - \underline{\quad} = 84$

7

$154 - \underline{\quad} = 64$

11

$98 - \underline{\quad} = 1$

15

$174 - \underline{\quad} = 90$

19

$47 - \underline{\quad} = 10$

23

$128 - \underline{\quad} = 73$

4

$\underline{\quad} - 26 = 47$

8

$\underline{\quad} - 9 = 15$

12

$\underline{\quad} - 65 = 126$

16

$\underline{\quad} - 93 = 145$

20

$\underline{\quad} - 62 = 89$

24

$\underline{\quad} - 28 = 55$

Steady repetition makes the next problem feel familiar.

WATCH FOR

Your child uses the same operation for every blank without checking where it appears.

SAY THIS

“Is the blank the whole you started with, or the part taken away?”
