

Missing Parts to 10

Set out. Ten is the whole. If you know the part left, count the distance from that part to ten to find how much was taken away.

SEE ONE

$$10 - 6 = 4$$

Ten is the whole. If you know the part left, count the distance from that part to ten to find how much was taken away.

$$10 - 6 = 4$$

TRY THE TRAIL

1

Start with the whole.

2

Count down to the part left.

3

The distance is the missing part.

Notice this: Subtraction and addition can describe the same two parts and whole.
